Field Crops Research

Contents of *Field Crops Research*, Volume 43

VOL. 43 NO. 1 — SEPTEMBER 1995

Model analysis of temperature and solar radiation limitations to maize potential productivity in a cool climate
D.R. Wilson (Christchurch, New Zealand), R.C. Muchow (St Lucia, Qld., Australia) and C.J. Murgatroyd (Christchurch, New Zealand) 1

Effects of broad-leaf crops and their sowing time on subsequent wheat production
D.P. Heenan (Wagga Wagga, N.S.W., Australia) 19

A non-conventional method for establishing upland crops following lowland rice in saturated soils
D.P. Garrity and S.P. Liboon (Manila, Philippines) 31

Use of random amplified polymorphic DNA for identification of South African soybean cultivars
C.M.S. Mienie, M.A. Smit and P.J. Pretorius (Potchefstroom, South Africa) 43

The use of bacterial antagonists for the control of cotton diseases
J.S. Safiyazov, R.N. Mannanov and R.K. Sattarova (Tashkent, Uzbekistan) 51

VOL. 43 NOS. 2–3 — OCTOBER 1995

Individual grain weight responses to genetic reduction in culm length in wheat as affected by source–sink manipulations
D.J. Miralles and G.A. Slafer (Buenos Aires, Argentina) 55

Water uptake by pearl millet in a semiarid environment
B.D. McIntyre, S.J. Riha (Ithaca, NY, USA) and D.J. Flower (Patancheru, Andra Pradesh, India) 67

Drought effects on biomass production and radiation-use efficiency in barley
P.D. Jamieson, R.J. Martin, G.S. Francis and D.R. Wilson (Christchurch, New Zealand) 77

Nitrogen fertilizer effects on growth, grain yield, and yield components of malting barley
W.E. Baethgen, C.B. Christianson (Muscle Shoals, AL, USA) and A.G. Lamothe (Colonia, Uruguay) 87

Effects of irrigation and N fertilizer application on sugarcane yield and quality
R.P. Wiedenfeld (Weslaco, TX, USA) 101

Selection of sugarcane families across variable environments I. Sources of variation and an optimal selection index
P. Jackson (Aitkenvale, Qld., Australia), T. McRae (Mackay, Qld., Australia) and M. Hogarth (Indooroopilly, Qld., Australia) 109

Selection of sugarcane families across variable environments II. Patterns of response and association with environmental factors
P. Jackson (Aitkenvale, Qld., Australia), T. McRae (Mackay, Qld., Australia) and M. Hogarth (Indooroopilly, Qld., Australia) 119

Grass barriers in cassava hillside cultivation: Rooting patterns and root growth dynamics
K. Tscherning, D.E. Leihner, T.H. Hilger (Stuttgart, Germany), K.M. Müller-Sämann and M.A. El Sharkawy (Cali, Colombia) 131

Book Reviews 141
